Connecting Technology & Innovation

## HD Spotlight

The shift to high definition video has never been more evident. New HD cameras, displays, recorders and frame grabbers have surfaced in the past weeks. Here's a few favourites from IntegrYS technology partners.

Jai has new HD progressive scan cameras in both colour and monochrome:

Cohu has a line of HD dome cameras, specifically designed for intelligent traffic and security applications.

Imperx has released a new HD camera line designed for environments ranging from -40 to +70 degrees. They've also got a new HD frame grabber.

Matrox also has a new PCIe short card Frame Grabber which works with HD/SD in analog or digital.

And finally, RGB Spectrum has a new HD recorder designed for Aerospace & Defence simulators, or similar needs for high-speed/high-res video. It even records radar, sonar and x-ray in high def.

Ask IntegrYS how HD fits into your imaging plans - and benefits your business plan.

## New IntegrYS Website - Latest Customer Service Initiative

IntegrYS is proud to announce the launch of its new website, officially live now!

Adopting new website technology allows us to now update the site more frequently, provide you with an RSS feed from key technology partners, and highlight our service and technology offerings in a much clearer way. Be sure to visit us and check out the exciting innovations we have implemented.

A key message we want to illustrate is that IntegrYS is not all things to all people; we have specialized strengths, enabling us to seamlessly integrate the diverse layers of technology and services into one stop solutions. Our exposure to a wide range of technologies allows us to migrate proven transformational technology to new sectors. The diversity of our applications in solving problems enables IntegrYS to connect technology and innovation. Let IntegrYS focus on solving your technology problems so you can focus on your area of excellence.

A driving force for the new website was usability. We needed a website that was user friendly. This includes being able to search for the technology and service solutions you need by technology, manufacturing partner and by industry sector. New is also the ability to browse application studies by sector, so you can see how these technologies have been applied in innovative ways to solve specific problems. Now you can easily find the information you are looking for, in the way you want it presented. Looking for more information or need to speak with someone directly? Easily locate an expert by industry sector or by geographic location.

Be sure to bookmark our new site, and check back frequently for news highlights!

## New Technology Partners

IntegrYS President Brian Flippance has just returned from a productive visit to the UK, where he was identifying hot imaging technology for Intelligent Transportation. As a result of this and other recent tech tours, IntegrYS is pleased to announce the addition of Redspeed, Vigilant Video, LMI Technologies and Rajant Networks as new video, communication & imaging technology partners. Click below for links to their websites:
